

# McAfee Connected Program Guide

The McAfee® Connected partner program helps technology partners worldwide test their products and services as interoperable with McAfee solutions. This testing process ensures that the third-party hardware, software, and services customers choose perform well with McAfee solutions. As a result, customers simplify their purchase decisions, reduce testing costs, and increase overall solution confidence.

## Value for Partners

Partners can take advantage of working at the forefront with the leader in the security industry. When partners qualify their solutions as interoperable with McAfee products, they gain exposure to McAfee customers around the globe, an easily recognizable partner program brand, and a proof point that demonstrates their products are enterprise ready.

## McAfee Solutions Currently Available for Interoperability Testing

McAfee Solution	Solution Version
McAfee MOVE AV for VDI	1.5

## Program Requirements

### Program Agreement

The McAfee Connected program agreement defines the terms and conditions of the program and is required for membership. The McAfee Connected program agreement is update from time to time. A current version of the Program Agreement is available upon request made to: [mcafeeconnected\\_info@mcafee.com](mailto:mcafeeconnected_info@mcafee.com)

### Interoperability Testing

Compatibility testing shall be conducted solely by the program member on a per product basis using the compatibility testing documentation provided by McAfee, therefore program members are responsible for all warranty and liability claims that arise as a result of claiming their product or service is McAfee Connected. McAfee reserves the right to review the completed testing results and decide at its own discretion whether or not the testing results are sufficient for entry into the McAfee Connected program. McAfee reserves the right to request additional or substantially different testing procedures in order to ensure that overall testing objectives have been fulfilled.

A more detailed description of the compatibility testing and program participation requirements may be found in the McAfee Connected program agreement which is available upon request.

McAfee Connected Compatibility Testing documentation and program agreement are available upon request. Requests may be sent to:

### Program Logo Branding and Usage Guidelines

Coming soon

### Program Fees

There are currently no fees associated with the McAfee Connected program. McAfee reserves the right to introduce fees for this program, and to introduce additional program tiers which may only be available for a fee. Program members are subject to whatever fees may be required at the time they sign their agreement. Specific fee requirements in effect when a program member joins the program shall remain in effect for the term of their agreement.

#### McAfee Connected Program Guide— Version 1
