

McAfee Security Innovation Alliance Accelerator Program from Accuvant

Significantly reduce your total integration efforts and costs

As a partner in the McAfee® Security Innovation Alliance program, an important step in your journey may be to integrate your product with the McAfee ePolicy Orchestrator® (McAfee ePO™) platform. Does your team lack the necessary time, resources, and experience to swiftly perform this integration? If your answer is “yes,” the McAfee Security Innovation Alliance Accelerator Program from Accuvant may be perfect for you. Let an expert team of specialized integration developers help you quickly integrate your product with the McAfee ePO platform. By leveraging the McAfee Security Innovation Alliance Accelerator Program from Accuvant, you can make your technology more compelling to McAfee customers, including more than 40,000 organizations managing more than 60 million endpoints using the McAfee ePO platform. Get started today.

McAfee Compatible Solution

McAfee-trained

The Accuvant integration team has dedicated and experienced McAfee Security Innovation Alliance-trained developers.

Personalized service

The Accuvant integration team is an independent McAfee Security Innovation Alliance integration provider. The team is dedicated to customer satisfaction: your organization gets personalized treatment, every step of the way.

Cybersecurity experts

The Accuvant integration team, including many field consultants, have been working closely with and integrating various solutions into McAfee products for some of the largest companies worldwide.

For further information, call Accuvant at 410.855.8864.

Integration Solution Packages

Accuvant offers six integration packages designed to meet the needs of McAfee Security Innovation Alliance partner organizations. From complete integration services to architectural Integration, the McAfee Security Innovation Alliance Accelerator Program from Accuvant is designed to deliver your product to the McAfee market as quickly as possible.

Agent Deployment Jumpstart

Accuvant will enable your endpoint agent to be easily deployed and managed via the McAfee ePolicy Orchestrator (McAfee ePO) platform, including software installation, upgrade, and removal. This package is ideal for organizations with agent-based solutions that are looking to take an immediate first step toward McAfee ePO platform integration.

Reporting Jumpstart

Accuvant will work with you to define customer use cases and build custom reporting from your product to the McAfee ePO platform. Accuvant will then develop the ideal McAfee ePO dashboard, which includes visibility data, compliance metrics, trends, and other management reports available within your product.

Data Integration Jumpstart

Accuvant will drive an integration to push your event data into McAfee ePO dashboards. Utilizing the integration team's data normalization technology, Accuvant can deliver the integration for the best use cases that they identify with you prior to the start of the integration effort.

Upgrade Assistance

Accuvant will assist you in keeping your existing integration compatible with newly released versions of McAfee ePO software. The Accuvant integration team will evaluate your existing extension and make necessary modifications utilizing the newest versions of the software development kit (SDK). This package includes assistance with line-by-line code reviews, test case recommendations, reviews, and development support.

About McAfee Security Innovation Alliance

The McAfee Security Innovation Alliance is a technology partnering program to help accelerate the development of interoperable security products and to simplify the integration of these products within complex customer environments. Working together, McAfee and its partners deliver solutions that are more comprehensive than those available from any single vendor.

Participation in the McAfee Security Innovation Alliance allows you to extend your reach and create new revenue opportunities by adding complementary capabilities not found in core McAfee offerings. The program offers joint marketing, lead generation, and channel synergies that help create a win-win scenario for you, our customers, our channel partners, and McAfee.

About Accuvant

Accuvant is a cybersecurity solutions and services provider specializing in the protection of enterprise and classified government infrastructures. Accuvant has implemented hundreds of complex and custom solutions for anti-virus, endpoint encryption, host intrusion prevention, data loss prevention, firewalls, network intrusion prevention, vulnerability management, and integrated host-based security systems. Contact Accuvant at 410.855.8864 or SIA@Accuvant.com.

Integration Support

Accuvant will provide valued architectural support and oversight to McAfee Security Innovation Alliance partners who wish to integrate their product with internal resources. The Accuvant integration team will help you pinpoint McAfee Security Innovation Alliance integration components and provide documentation and communication support, along with remote coding and configuration assistance as needed.

McAfee Security Innovation Alliance Custom Express Full Service

Accuvant offers a complete solution to McAfee Security Innovation Alliance partner organizations who want to integrate their product with McAfee ePO software. If your product requires a custom integration with the McAfee ePO platform, the Accuvant integration team can help your organization create an architecture design and development plan. No plan is too complex. This package includes all standard integration steps, support, and managing the integration through the robust McAfee integration testing process to achieve the McAfee Compatible designation.

Excellent Return on Investment

- Faster time to a joint solution of interest to more than 35,000 McAfee ePO platform customers managing more than 60 million endpoints
- Bypass the learning curve and cut total McAfee Security Innovation Alliance integration costs by up to 80 percent
- Focus your resources on your core business. Let the Accuvant experts handle the integration for you.

Premium Integration Services and Support

The Accuvant integration team is committed to providing you with the most complete integration services and support, including the deliverables below.

McAfee Security Innovation Alliance Partner Delivery Package (PDP) pre-testing

This support package from Accuvant streamlines your testing effort. It includes integration pre-testing support to better prepare your integration for success during McAfee Compatibility testing.

Integration roadmap

The Accuvant integration team works with your organization to create an integration roadmap based on your unique business needs and product timeline.

Dedicated support and availability

Get access to your dedicated integration specialists when you need them via phone, email, or web.

Full version control

This includes a fully accessible version control system that allows the customer to track development milestones and branches in the development code base.

Maintainable code base

The integration team's coding standards dictate that all code will be created in a modular format for easy upgrades.

Annual Product Maintenance

With major new releases of McAfee ePO software, it will be necessary to make modifications to your integration. The Accuvant integration team will provide ongoing maintenance to its developed software as part of the annual product maintenance offering.
