Professional Services A DIVISION OF McAfee

Service Line Datasheet

Foundstone Professional Services Strategic Security Solutions

Foundstone Professional Services balances the strategic benefits of business consulting with a tactical, hands-on approach to technology consulting and security training.

Whether through business consulting, technology consulting, education, or a combination of all three, Foundstone delivers strategic solutions to security challenges, going well beyond a short-term fix. Our security experts make sure you have the right processes and procedures in place, the most effective tools to support those processes and procedures, and the education to make it all work together effectively and seamlessly.

Foundstone customizes security services to meet your specific needs or implements one of the following services.
