

McAfee ePolicy Orchestrator® Jump Start

Objective

This consulting service is designed to provide customers with everything they need to fully deploy ePolicy Orchestrator (ePO). This full scale service includes development of a strategy for the use of ePO, configuration of ePO to execute that strategy, an interactive pilot deployment of ePO, and production rollout and testing of the agents to 100 nodes.

Tasks Performed

ePO Strategy Development

Our consultants will work with your staff to develop a strategy for the deployment and use of ePO in maintenance and virus outbreak mode. Specific areas addressed include:

- Development of a strategy for the complete rollout of ePO to all desktops and servers within the enterprise
- Desktop security policy development
- Strategy for agent updates to create minimal impact on network and desktop performance
- ePO Report interpretation and scheduling
- Outbreak containment procedures

Setup and Configuration

After the development of the ePO strategy, the consultant will deploy, configure, and test the technology with customer administrators. This interactive learning session will provide customers with a pilot ePO deployment customized to their specific requirements and solid knowledge on how to customize the product as their requirements evolve with use.

Specific tasks performed are:

- Install and configure ePO software on 1 Windows server
- Deploy ePO agents to a pilot network.
- Test ePO software agent distribution method on client systems - up to eight workstations running VirusScan Enterprise and up to two file servers running VirusScan Enterprise
- Test virus detection policy enforcement on client systems where agent is installed - eight workstations and up to two file servers
- Configure ePO to provide centralized reporting for installed McAfee Security products with ePO agents (desktop/VirusScan Enterprise, file server/NetShield NT, GroupWare/GroupShield Exchange, e500 appliance)
- Configure ePO to receive and distribute:
 - Automatic DAT file updates
 - Regular product updates
 - Engine updates
- Configure ePO to enforce customized desktop security policies
- Configure product to provide emergency updates
- Rollout production implementation to one hundred (100) nodes

Knowledge Transfer

The consultant will provide knowledge transfer to one client administrator on the installation, configuration and management for ePolicy Orchestrator.
