

# McAfee Foundstone® Jump Start

## Objective

The Foundstone Jump Start service is designed to provide customers with everything they need to get started using McAfee Foundstone. This service includes development of a strategy for the use of Foundstone and installation, configuration and knowledge transfer.

## Tasks Performed

### Strategy Development

The consultant will work the client to develop a strategy for the Foundstone deployment which will cover:

- Outlining the client's network protection goals.
- Placement of scan engines for most effective protection of networks.
- Develop organizational unit and asset group hierarchy structure
- Examination of the options for dealing with asymmetric routing on network
- Examination of the options for dealing with networks that failover.

### Setup and Configuration

- Install one Foundstone manager
- Install two Foundstone scanners
- Configuration of trouble ticket workflow
- Creation of scans to support enterprise scan strategy
- Configuration of application security administration
- Configure OS finger printing
- Set up administrative alerting

### Knowledge Transfer

A two day knowledge transfer session will teach Foundstone administrators to:

- Schedule signature and software updates for scanners
- Create user roles and access privileges
- Back-up and maintain the alert database
- Manage and investigate alerts.
- Understand how all categories of attacks are recognized and how events are generated.
- Understand how events are stored in the database.
- Provide expertise regarding how to import IP address from routing tables to discovery scan templates
- Effectively use the historical view of alerts to view specific, filtered data.
- Create User Defined Reports.
