## McAfee Hercules V-Flash Update

### Version Detail

Hercules Version(s)	V-Flash Version Number
4.0.0	400015701
4.1.0/4.2.0/4.5.0	401010601

### Totals per Environment

Environment	Total Remedies
Windows 2000	5
Windows Server 2003	5
Windows XP	5
Windows Vista Business	3
Windows Vista Home	3
Solaris 10.x	1
<b>Total</b>	<b>22</b>

In our continuing effort to providing the latest vulnerability remediation data, McAfee has released this V-Flash update for McAfee Hercules products. The following is a summary of the vulnerabilities and their updated/added environments.

#### An important note about MS08-029:

A remedy for Microsoft Security Bulletin MS08-029 "Vulnerability in Microsoft Malware Protection Engine Could Allow Denial of Service (952044)" will not be provided for Hercules Remediation Manager. This update is an online update that is only deployed via a private internal deployment mechanism and is not publicly available as a patch binary. Per Microsoft's list of products affected by MS08-029, "These affected products provide built-in mechanisms for automatic detection and deployment of updates." Customers using Microsoft Malware Protection products can review the security bulletin for more information on deployment of these updates.

	New	Windows Vista Home
	New	Windows XP
65998 - Solaris 10: SCTP Protocol May Result in a Panic and Denial of Service (DoS)	New	Solaris 10.x

## How to Apply V-Flashes

Hercules customers can use the Hercules Administrator to manage review/manage their V-Flash updates. V-Flash update can be performed on demand or on a scheduled basis. To perform a V-Flash on demand, go to the Operations Center and click on the V-Flash tab. Then click on V-Flash Now. The progress will be indicated on the screen (refresh may be required). Settings can be modified by clicking the V-Flash Settings button and modifying for the desired day interval and time and clicking OK. For full details on V-Flash, consult the "Manage V-Flash Server Operations" section of the Hercules User's Guide.
