

McAfee Endpoint Security 10.1 Essentials

Education Services eLearning Course

The McAfee® Endpoint Security 10.1 Essentials course provides an introduction to the tasks crucial to setting up and administering McAfee Endpoint Security. McAfee Endpoint Security combines threat prevention, firewall, and web control to take immediate action against potentially dangerous applications, downloads, websites, and files.

Audience

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with system endpoint security.

Course Goals

- Identify the different user interface modes, list the scan types, manage quarantined files, and perform Quick Scan, and Full Scan
 - List the installation processes, and identify the error messages and codes
 - List the installation processes, identify the different options under firewall extension and in the client user interface
 - Identify the different system scans, and list the on-access and on-demand scan settings
 - Identify the different settings, specify the set of actions, learn how to set the default search engine, and define actions to take for rated sites
-
