

# About McAfee

McAfee is the online protection cybersecurity company. Inspired by the purpose to make life online safe and enjoyable for everyone, we create solutions that free and empower everyone to confidently enjoy life online. We deliver an all-in-one security, identity protection, and privacy service that helps keep people safe—across activities, devices, and locations through a personalized, intelligent, and inclusive approach.

We protect millions of users around the world and empower them to experience more by making it simpler to be safe online: our smart technology helps them effortlessly navigate risks, make smarter decisions, and take charge of their personal information. McAfee is designed to respond to the individual needs of everyone in your family, proactively keeping them protected—no matter their age, their interests, or how much they know about technology.

# Home & Small Business

McAfee secures home PCs, tablets, phones, and connected devices with easy-to-use, practical solutions. Millions of consumers rely on our solutions, which include an online subscription service that keeps their protection up-to-date and provides them with the latest technology. McAfee products shield consumers from identity theft, phishing scams, spyware, malicious websites, and other threats that endanger the online experience.

The McAfee portfolio of integrated solutions and services for small business provides always up-to-date protection for desktops, servers, and networks. With a focus on delivering security-as-a-service, we give small businesses the confidence of having full-time security expertise without the need to hire IT staff. Our easy-to-manage products protect small businesses against a wide array of threats, including malware, spam, unauthorized network access, and threats in the cloud.

Home users and small businesses buy McAfee technology online and from retail stores or get protection through cell phone carriers, internet service providers (ISPs), device makers, or other McAfee partners. We combine a proven, global track record with a commitment to investing in the future of online protection, keeping our users safe against new and evolving threats.
