

McAfee's Response to the War in Ukraine

March 23, 2022

McAfee stands with the people of Ukraine, and we condemn the unprovoked invasion by the Russian government. While McAfee does not have employees in Ukraine or Russia, the ongoing humanitarian crisis and tragic loss of life weigh heavily on all of us.

McAfee has suspended new business in Russia and Belarus. This includes sales, renewals, marketing, and customer support.

To help meet the increasing humanitarian needs, McAfee is donating to and offering employee gift matching to Ukrainian relief effort funds from The American Red Cross and Save the Children.

To further support Ukraine, McAfee is waiving payment for online protection services for existing customers in non-sanctioned areas in Ukraine until the end of the year to remove any financial constraints and provide online security.

McAfee will continue to monitor and take action as needed. McAfee joins companies and governments around the world in support of a swift resolution that will bring peace to the people of Ukraine.
