McAfee™

McAfee Application Control and McAfee Change Control 8.3.2 Essentials

McAfee® Education Services eLearning Course

The purpose of this course is to introduce the basic uses, architecture, configuration, maintenance, and troubleshooting techniques available for McAfee® Application Control and McAfee® Change Control (MACC) 8.3.2. Additionally, the resources and videos available in the course are packaged for use individually so that can be referenced later.

Course Goals

- Describe McAfee Application Control and McAfee Change Control solution.
- Plan McAfee Application Control and McAfee Change Control deployment.
- Install and configure McAfee Application Control and McAfee Change Control.
- Create and manage policies and rules.
- Manage the software inventory.

- Enable and configure McAfee Change Control.
- Configure Integrity Monitoring policies.
- Gather and analyze events and alerts.
- Perform basic troubleshooting.
- Describe Inventory mode.
- Describe Common Platform Enumeration (CPE).
- Describe Trusted local group.

Audience

System and network administrators, security personnel, auditors, and/or consultants concerned with network and system security should take this course.

Recommended Pre-work

It is recommended that students have a working knowledge of Microsoft Windows administration, system administration concepts, a basic understanding of computer security concepts, and a general understanding of internet services.
