

McAfee Data Loss Prevention Endpoint Administration (11.0)

McAfee® Education Services guided on-demand training

The McAfee® Data Loss Prevention Endpoint Administration 11.0 guided on-demand course from McAfee® Education Services offers you comprehensive and focused multimedia training from experienced instructors in a self-paced environment at your desk. The course delivers the same curriculum as the instructor-led training through virtual, on-demand coursework, recorded instructor presentations, use case scenarios from McAfee best practices and experiences, and hands-on lab exercises. You'll have email access to the instructor to get your questions answered.

This course provides in-depth training on the tools you need to design, implement, configure, and use McAfee® Data Loss Prevention Endpoint in order to safeguard intellectual property and ensure compliance. The course details how this solution uses McAfee® ePolicy Orchestrator® (McAfee ePO™) software for centralized management. It also explains how to monitor and address risky, day-to-day end-user actions, such as emailing, web posting, printing, clipboards, screen captures, device control, uploading to the cloud, and more.

Audience

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with system endpoint security.

COURSE DESCRIPTION

Agenda at a Glance

Modules 1-7

- Welcome
- McAfee Data Loss Prevention Solution Overview
- McAfee Data Loss Prevention Endpoint Fundamentals
- Planning the Deployment
- Preparing the Enterprise Environment
- Installing McAfee Data Loss Prevention Endpoint Software
- Deploying Client Endpoints

Modules 15-20

- Classifying Sensitive Content
- Content Fingerprinting and Classification Criteria Rules
- Data Protection Definitions
- Configuring Data Protection Rules
- Endpoint Discovery
- Monitoring and Reporting

Modules 8-14

- Configuring the Client
- Help Desk
- Configuring Permission Sets
- McAfee Data Loss Prevention Policy Manager Overview
- Privileged Users and End-User Group Definitions
- Device Control
- Device Rule Sets and Rules

Modules 21-24

- Case Management
- Basic Troubleshooting
- McAfee File and Removable Media Protection
- Protecting Files with Rights Management

Recommended Pre-Work

- Solid knowledge of Microsoft Windows and system administration and network technologies
- Solid knowledge of computer security, command line syntax, malware/anti-malware, virus/antivirus, and web technologies
- Prior experience with McAfee ePO software

Learning Objectives

Welcome

Become familiar with McAfee information and support resources and feedback mechanisms.

McAfee Data Loss Prevention Solution Overview

Describe the solution, its features, and its functionality.

McAfee Data Loss Prevention Endpoint Fundamentals

Describe the McAfee Data Loss Prevention Endpoint solution, its key features, deployment architecture, and new features and enhancements for this release.

Planning the Deployment

Describe the business, software, hardware, and component requirements to consider when planning deployment.

Preparing the Enterprise Environment

Prepare Active Directory, add a resource folder, and configure sharing, permissions, and security settings.

Installing McAfee Data Loss Prevention Endpoint Software

Describe how to add McAfee Data Loss Prevention Endpoint extensions and packages to the McAfee ePO software server and verify installation.

COURSE DESCRIPTION

Deploying Client Endpoints

Describe ways to deploy the software to endpoints and verify the success of the deployment.

Configuring the Client

Describe how to configure the McAfee Data Loss Prevention Client Configuration Policy and ensure policies are assigned to the appropriate groups or systems.

Help Desk

Describe the purpose of the McAfee Data Loss Prevention Help Desk and its key features, configure the Help Desk feature, and use the Help Desk feature to generate keys.

Configuring Permission Sets

Identify default permission sets included with McAfee ePO software and McAfee Data Loss Prevention Endpoint software, and create custom permission sets.

McAfee Data Loss Prevention Policy Manager Overview

Access the McAfee Data Loss Prevention Policy Manager, and navigate through McAfee Data Loss Prevention Policy Manager tabs to become familiar with its design and use.

Privileged Users and End-User Group Definitions

Register Active Directory server, create a Privileged User, and create End-User Group definitions.

Device Control

Describe the Device Control feature, and configure Device Control to meet customer requirements.

Device Rule Sets and Rules

Identify the built-in rule sets and rules available for use, describe the parts of a device rule, and create device rules to meet customer requirements.

Classifying Sensitive Content

Explain classification definitions and criteria and the Classification module features.

Content Fingerprinting and Classification Criteria Rules

Explain how to create content fingerprinting criteria, how to create content classification rules, and how persistent fingerprinting works.

Data Protection Definitions

Identify data protection definitions and their associated data protection rules, create definitions used for data protection rules, and configure end-user notifications and justifications.

Configuring Data Protection Rules

Identify the building blocks for data protection rules, build data protection rules to meet customer requirements, and provide examples of use cases for data protection rules.

COURSE DESCRIPTION

Endpoint Discovery

Identify the built-in endpoint discovery rule sets and rules available for immediate use, identify the parts of a discovery rule, and create discovery rules to meet customer requirements.

Monitoring and Reporting

Identify and use the monitoring and reporting features of McAfee® Data Loss Prevention Endpoint, including McAfee® Data Loss Prevention Incident Manager and McAfee® Data Loss Prevention Operational Events.

Case Management

Describe the functionality of McAfee Data Loss Prevention Case Management, create new cases to group-related incidents, and administer cases using McAfee Data Loss Prevention Case Management.

Basic Troubleshooting

Describe the use of the Diagnostic Tool and how to use Debug Logging.

McAfee File and Removable Media Protection

Describe the McAfee® File and Removable Media Protection solution and install the solution.

Protecting Files with Rights Management

Explain how Rights Management works in the McAfee Data Loss Prevention environment, and configure and use supported Rights Management products.
