

Data Exchange Layer Essentials

McAfee® Education Services eLearning Course

The Data Exchange Layer (DXL) Essentials course from McAfee® Education Services provides attendees with training on the design, setup, configuration, and management of the DXL server and its components. In addition, students will learn how to perform the basic troubleshooting tasks to resolve most common issues.

Audience

System and network administrators, security personnel, auditors, and/or consultants concerned with network and system security should take this course.

Recommended Pre-Work

It is recommended that students have a working knowledge of Microsoft Windows administration, system administration concepts, a basic understanding of computer security concepts, and a general understanding of internet services.
