

McAfee Endpoint Security 10.x Administration

McAfee® Education Services guided on-demand training

Our McAfee® Endpoint Security 10.X Administration guided on-demand course provides an in-depth introduction to the tasks crucial to set up and administer McAfee Endpoint Security. The course delivers the same curriculum as the instructor-led training through virtual, on-demand coursework, recorded instructor presentations, use case scenarios from McAfee best practices and experiences, and hands-on lab exercises. You'll have email access to the instructor to get your questions answered.

McAfee Endpoint Security combines Threat Prevention, Firewall, Web Control, and Adaptive Threat Protection to take immediate action against potentially dangerous applications, downloads, websites, and files. This course combines lectures and practical lab exercises, with significant time allocated for hands-on interaction with the McAfee Endpoint Security user interface, as well as detailed instructions for the integration of this solution.

Audience

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with system endpoint security.

Agenda at a Glance

Modules 1-6

- Welcome
- Solution Overview
- Planning the Deployment
- McAfee® ePolicy Orchestrator® (McAfee ePO™) Server Overview
- Installing McAfee Endpoint Security Software
- Migrating Legacy Settings

Modules 7-12

- Endpoint Upgrade Assistant
 - Deploying the Client Endpoints
 - Using the McAfee Endpoint Security Client
 - Policy Management Overview
 - Configuring Common Settings
 - Threat Prevention: Configuring Access Protection
-

COURSE DESCRIPTION

Agenda at a Glance

Modules 13–18

- Threat Prevention: Exploit Prevention
- Threat Prevention: Configuring the On-Access Scan
- Threat Prevention: Configuring the On-Demand Scan
- Configuring Threat Prevention Options
- Firewall Overview and Configuring Firewall Options
- Configuring Firewall Rules and Groups

Modules 19–26

- Configuring Web Control
 - Monitoring and Reporting
 - Configuring Adaptive Threat Protection
 - McAfee Endpoint Security for Servers
 - Data Exchange Layer Fundamentals
 - Configuring and Using Data Exchange Layer
 - McAfee® Threat Intelligence Exchange Fundamentals
 - Configuring and Using McAfee Threat Intelligence Exchange
-

Recommended Pre-Work

- Working knowledge of Windows and system administration, network technologies
- Basic understanding of computer security, command line syntax, malware/anti-malware, virus/antivirus, and web technologies
- Working knowledge of McAfee ePO software

Learning Objectives

Solution Overview

Describe the McAfee Endpoint Security solution, including key features, benefits, and enhancements within this latest release.

Planning the Deployment

Plan a McAfee Endpoint Security deployment, including business requirements, platform hardware, operating systems, and components included with McAfee Endpoint Security.

McAfee ePO Server Overview

Log into the McAfee ePO server and navigate through the interfaces to identify page controls, page types, and features.

Installing McAfee Endpoint Security Software

Obtain the required software components and perform the necessary procedures to add the software components to the McAfee ePO server and deploy the endpoint clients.

Migrating Legacy Settings

Use the McAfee® Endpoint Migration Assistant to migrate policies and settings from legacy McAfee products to McAfee Endpoint Security both manually and automatically.

Endpoint Upgrade Assistant

Use the Endpoint Upgrade Assistant perform upgrades from legacy McAfee products to McAfee Endpoint Security.

COURSE DESCRIPTION

Deploying Client Endpoints

Deploy the endpoint clients and verify the success of the deployment.

Using the McAfee Endpoint Security Client

Open the McAfee Endpoint Security client and navigate the user interface to view and understand the default configurations and settings.

Policy Management Overview

Describe the purpose of McAfee ePO software policies and communicate about key terms and concepts.

Configuring Common Settings

Configure common settings that apply to all McAfee Endpoint Security modules and features, such as Client interface, Language, Logging, Proxy server for McAfee Global Threat Intelligence reputation, and Update configuration.

Threat Prevention: Configuring Access Protection

Describe Threat Prevention Access Protection features, and configure Access Protection settings to meet customer requirements.

Threat Prevention: Exploit Prevention

Identify Threat Prevention Exploit Prevention features, and configure Exploit Prevention settings to meet customer requirements.

Threat Prevention: Configuring the On-Access Scan

Describe Threat Prevention On-Access Scan feature and configure On-Access scan settings to meet customer requirements.

Threat Prevention: Configuring the On-Demand Scan

Describe Threat Prevention On-Demand Scan feature and configure On-Demand scan settings to meet customer requirements.

Configuring Threat Prevention Options

Identify Quarantine Manager, Exclusions by Detection Name, and Potentially Unwanted Program (PUP) Detection features, and configure these feature settings to meet customer requirements.

Firewall Overview and Configuring Firewall Options

Describe Firewall features, communicate about key Firewall terms and concepts, and configure overall Firewall Options settings to meet customer requirements.

Configuring Firewall Rules and Groups

Identify the purpose of Firewall rules and groups, and configure Firewall rules and groups to meet customer requirements.

Related Courses

- McAfee ePO Software Administration
- McAfee® Advanced Threat Defense Administration
- McAfee® Web Gateway Administration

COURSE DESCRIPTION

Configuring Web Control

Describe Web Control features and configure Web Control settings to meet customer requirements.

Monitoring and Reporting

Monitor the solution using dashboards, queries, reports, and threat event detail.

Configuring Adaptive Threat Protection

Deploy the Adaptive Threat Protection module and configure Dynamic Application Containment (DAC) policies.

McAfee Endpoint Security for Servers

Describe the components and benefits of the McAfee Endpoint Security for Servers, how the CPU load is calculated and list the benefits of McAfee Endpoint Security for Servers.

Data Exchange Layer Fundamentals

Describe the Data Exchange Layer (DXL) solution and its key features.

Configuring and Using Data Exchange Layer

Identify and distinguish between the policies required for a DXL environment.

McAfee Threat Intelligence Exchange Fundamentals

Describe the McAfee Threat Intelligence Exchange solution and its key features.

Configuring and Using McAfee Threat Intelligence Exchange

Identify and distinguish between the policies required for a McAfee Threat Intelligence Exchange environment.
