

# McAfee Enterprise Security Manager Administration 101

## McAfee® Education Services Instructor-Led Training

McAfee® Enterprise Security Manager—the heart of our security information and event management (SIEM) solution—provides near real-time visibility into the activity on all your systems, networks, databases, and applications. This enables you to detect, correlate, and remedy threats in minutes across your entire IT infrastructure. This course prepares McAfee Enterprise Security Manager engineers and analysts to understand, communicate, and use the features provided by McAfee Enterprise Security Manager. Through hands-on lab exercises, you will learn how to optimize the McAfee Enterprise Security Manager by using McAfee-recommended best practices and methodologies.

### Earn up to 32 CPEs after completing this course.\*

\* Student must self-report for CPE credits. We cannot guarantee any specific quantity, as it is up to the program or certification group to determine what they will or will not accept.

### Audience

This course is aimed at McAfee Enterprise Security Manager users responsible for monitoring activity on systems, networks, databases, applications, and for configuration and management of the McAfee Enterprise Security Manager solution. Attendees should have a working knowledge of networking and system administration concepts, a good understanding of computer security concepts, and a general understanding of networking and application software.

### Agenda at a Glance

#### Day 1

- Course Introduction
- Architecture Overview
- Devices and Settings
- McAfee Enterprise Security Manager Interface and Views

#### Day 2

- Data Sources
- Working with McAfee® Enterprise Log Manager and McAfee® Enterprise Log Search
- Event Analysis
- Aggregation

### Connect With Us

## COURSE DESCRIPTION

---

### Agenda at a Glance

---

#### Day 3

- Watch Lists and Policy Editor
- Query Filters
- Rule Correlation
- Alarms

#### Day 4

- Workflow and Analysis
  - Reports
  - System Maintenance and Troubleshooting
  - Introduction to Use Case Design
- 

### Learning Objectives

#### McAfee Enterprise Security Manager Overview

Define McAfee Enterprise Security Manager and SIEM concepts, identify appliances and their features, and describe the McAfee Enterprise Security Manager solution component architecture.

#### Devices

Configure and customize receiver data sources and data source profiles.

#### McAfee Enterprise Log Manager and McAfee Enterprise Log Search

Configure McAfee Enterprise Log Manager settings, and mirror McAfee Enterprise Log Manager data storage.

#### McAfee Enterprise Security Manager Views

Effectively navigate the McAfee Enterprise Security Manager dashboard, and create custom McAfee Enterprise Security Manager data views.

#### Data Sources

Locate events, and manage cases using a variety of data sources, assets, and enriched data.

#### Aggregation

Customize event and flow aggregation fields on a per-signature basis, and define the advantages and nuances associated with event and flow aggregation.

#### Policy Editor

Create, modify, and delete McAfee Enterprise Security Manager policies within the policy editor.

#### Query Filters

Apply filters in views, create filter sets, use string normalization, and understand the basic syntax of regular expressions.

#### Correlation

Configure and deploy custom correlation rules within the correlation editor.

#### Watch Lists and Alarms

Create and configure watch lists and alarms.

#### Reports

Create and configure reports.

---

### Recommended Pre-Work

It is recommended that students have a working knowledge of networking and system administration concepts.
