

McAfee Threat Intelligence Exchange Administration

Education Services instructor-led training

Our McAfee® Threat Intelligence Exchange Administration course provides an in-depth introduction to policy management and the tasks that are crucial to setting up, administering, and managing Data Exchange Layer (DXL) and McAfee Threat Intelligence Exchange solutions. The combined solutions enable intelligent threat information sharing to your connected security solutions, including third-party solutions. This two-day course combines lectures and practical lab exercises, with significant time allocated for hands-on interaction with the McAfee Threat Intelligence Exchange and DXL user interfaces, as well as detailed instructions for the integration of this solution.

Audience

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with system endpoint security.

Agenda at a Glance

Day 1

- Welcome
- McAfee ePolicy Orchestrator® (McAfee ePO™) Software Overview
- Policy Management Overview
- Data Exchange Layer Overview

Day 2

- McAfee Threat Intelligence Exchange Overview
 - Data Exchange Layer Management and Use
 - McAfee Threat Intelligence Exchange Management and Use
-

COURSE DESCRIPTION

Learning Objectives

McAfee ePO Software Overview

Identify key differences between the McAfee ePO on-premises and McAfee ePO cloud interfaces and navigate through the interfaces.

Policy Management Overview

Explain the concepts and terms related to policy management.

Data Exchange Layer Overview

Explain DXL solution components, features, and functionality.

McAfee Threat Intelligence Exchange Overview

Explain McAfee Threat Intelligence Exchange solution components, features, and functionality.

Data Exchange Layer Management and Use

Perform post-deployment DXL configuration and management tasks.

McAfee Threat Intelligence Exchange Management and Use

Perform post-deployment McAfee Threat Intelligence Exchange configuration and management tasks.

Recommended Pre-Work

- Working knowledge of Windows and system administration and network technologies
- Basic understanding of computer security, command line syntax, malware/anti-malware, virus/antivirus, and web technologies
- Working knowledge of McAfee ePO software

Related Courses

- McAfee VirusScan® and McAfee ePO Software Administration
- McAfee Advanced Threat Defense Administration
- McAfee Web Gateway Administration
- McAfee Endpoint Security Administration
