

McAfee Web Gateway 7.8 Essentials

McAfee® Education Services eLearning Course

McAfee® Web Gateway analyzes the nature and intent of all content and code entering the network from requested web pages, providing immediate protection against malware and other hidden threats. In this course, you'll learn how to install, configure, operate, and perform basic troubleshooting on McAfee Web Gateway for optimal protection.

Audience

System and network administrators, security personnel, auditors, and/or consultants concerned with network and system security should take this course.

Recommended Pre-Work

It is recommended that students have a working knowledge of Microsoft Windows administration, system administration concepts, a basic understanding of computer security concepts, and a general understanding of viruses and antivirus technologies.
