COURSE DESCRIPTION

McAfee Web Gateway 8.0 Essentials (Technical)

McAfee® Education Services eLearning Course

The McAfee® Web Gateway 8.0 Essentials (Technical) course from McAfee Education Services provides attendees an understanding of the benefits and capabilities of the McAfee Web Gateway solution, as well as knowledge of how to plan, deploy, configure, and use the solution to protect the network against threats arising from the web, such as viruses and other malware, inappropriate content, data leaks, and related issues. This course is delivered in multiple modules and an exam and is a total of 8 hours in length.

Course Goals

- Identify the purpose of the solution, as well as key features.
- Plan the deployment.
- Install and configure solution components.
- Configure rules, rule sets, lists, and related components to meet customer security, performance, and usage requirements.
- Implement controls for administrator access.
- Monitor the solution's operation and performance.
- Generate reports for more detailed analysis.
- Product integration.

Recommended Pre-Work

It is recommended that students have a working knowledge of Microsoft Windows administration, system administration concepts, a basic understanding of computer security concepts, and a general understanding of internet services.

Audience

System and network administrators, security personnel, auditors, and/ or consultants concerned with network and system security should take this course.
