

Every school has the right to be safe.

A security bundle designed and priced exclusively for Education customers.

The New (Virtual) Classroom

With remote and hybrid learning as the new normal, hackers have turned their attention to virtual classrooms and learning devices. Schools, parents, and students need cybersecurity protection now more than ever. McAfee is pleased to announce a powerful suite of security solutions designed specifically for Education customers' needs while meeting Education customers' limited budgets. With our Next-Gen AV, the **McAfee Secure School Suites** offer features and functionalities not found in other standalone products while managing to save hundreds of dollars per endpoint.
