Top Five Reasons to Migrate to McAfee Endpoint Security

To fight modern threats, you need a modern defense.

1. It’s stronger.
   - AV Comparatives study, 2017 – NSS Labs AEP Report
   - SC Magazine, July 5, 2017
   - AV-Test.org December 2017 Test Results
   - NSS Labs 2017 Advanced Endpoint Protection (AEP)
   - ESG Solution Validation, 2017, Frost & Sullivan
   - ESG Lab Validation
   - McAfee Endpoint Security is an upgrade to a market-leading modern endpoint defense.

2. It’s simpler.
   - 5/5 SC Media Best Buy
   - “Weaknesses: None that we found.”
   - 17.5 out of a possible 18 Top Product award AV Test
   - 0% false positives
   - 100% tested evasions blocked, NSS Labs 2017 Frost & Sullivan Best Practices Award

3. It’s more advanced.
   - Application Containment stops malicious actions at run-time before harm occurs.
   - Machine Learning: Enhances advanced analytics to ensure incident detection.
   - Integrated URL: Provides predictive behaviors not Haiting into next-generation and single-click remediation to contain attacks.
   - Cloud behavior: Detects and blocking powered by one of the largest real-world sensor grids in existence.

4. It’s proven.
   - “We can manage our entire security infrastructure from 2 to 3 panes of glass instead of 6 or 7. Fewer things to see, fewer things to miss and the ability to recover from an attack in minutes.”

5. It delivers ROI.
   - “We haven’t had a CryptoLocker outbreak in six months. With McAfee Endpoint Security, we have more visibility, more coverage, and more customer confidence than we have had in 12 years.”

McAfee Endpoint Security is an upgrade to a market-leading modern endpoint defense. Ready to migrate? Get started at www.mcafee.com/MovetoENS.
