

Automation and Orchestration Solution to SOC Overload.

Studies of market say:
Automate. Then orchestrate.

The average Security Operations Center (SOC) uses **25-30** tools.*

60% of security operations professionals say manual processes limit effectiveness.*

83% of the market is automating now, and **13%** have plans or want to automate.*

27% plan to purchase tools to automate and orchestrate their operations.*

IDC validation of automation

Across the McAfee Integrated Threat Defense Solution, IDC validated **50-100%** of actions are automated.

25 Threat Triage Steps

3 Threat Protection Platforms: Endpoint, Web, and Network Security

3 Security Analytic Engines

9 Different Threat Intelligence Checks

Threat functions automated include:

Zero-Day Malware Protection with Dynamic Endpoint

Ransomware Drive-by Download Protection

Server Malware Protection via Application Control

Threat Hunting

Malware Protection with IPS

IDC validated automation for 3-step threat hunting process:

Step 1: System Automatically Submits File for Verification

Step 2: Upon Conviction, System Applies Pre-determined Policies

Step 3: Administrator Remediates the Attack

McAfee solution achieves ROI faster.

4-Year ROI of **208%**

Payback Period of **20 Months**

Example: Top 100 U.S. FDIC Bank

McAfee solution improves productivity.

1-2 Panes of Glass Monitoring Environment

77% Fewer Events Per Year

90% Faster Resolution of Events

98% Less Productive Time Lost

McAfee solution produces real benefits.

\$3.02 M Benefits Average (Per Year) Over Four-Year Period

\$5-10 M Solution-Supported Additional Customer Revenue (Per Year)

Prices in US dollars.

Simplify your threat management through automation and orchestration using the integrated threat defense solutions from McAfee.
