

McAfee Web Security Certification Form

Please provide a manual review for the following McAfee products:

A "User" for McAfee web products is defined as any individual person capable of sending HTTP requests to or from the Internet to be processed by a McAfee product, regardless of whether the individual is actively using the product at any given time. In such cases where multiple unique Users use the same workstation to access the Internet, that workstation represents a single "User".

Product	Quantity
Web Security Gateway Edition (WSG or WEG)	
Web Protection (WPS or WES)	
SaaS Web Protection	
Web Anti-Malware	

If your product is not listed above, please provide the product name and usage below.
