How do I gain sufficient visibility into and place appropriate controls on my cloud environment?
Introducing MVISION Cloud Security Advisor

Enables enterprises to track cloud progress. Provides unique recommendations to prioritize cloud security controls.
Cloud Security Advisor—3 Key Components

1. **Cloud Security Report**  
   Shares insights into the enterprise cloud environment

2. **Cloud Security Maturity Quadrant**  
   Measures enterprise visibility and control w.r.t peers

3. **Cloud Security Recommendations**  
   Provides actionable recommendations
What is your Risk Factor?

Cloud Security Report: Q1 2019 to Date

High Risk Service Usage Increased

We observed more traffic to high risk services compared to last quarter. This could be due to:

- The addition of log data sources
- Risk scores dropping for specific services already in use
- Global risk calibration adjustments
- People using new services that haven't been controlled by policy
How do you Compare to Industry Peers?
Your Unique Recommendations

Checklist to Improve Your Scores

Visibility

- SaaS under management
  - 5 Recommendations

Control

- Report scheduled
  - 1 Recommendation
- Connected apps control policy enabled
  - 1 Recommendation
- Data in collaboration apps scanned for DLP
  - 3 Recommendations
- Percentage of threats detected
  - 1 Recommendation
- Percentage of anomalies detected
  - 1 Recommendation
- Shadow IT monitored
  - 5/5
- Collaboration policy for personal email domain enabled
  - 5/5

Total Points: 72/100

SaaS under management

SaaS instances with either API or Proxy enabled in all SaaS instances added to Service Management.

23%

3 Managed instances / 18 Unmanaged instances

What you can do

- Enable API access and/or set up Proxy for Box: Default.
- Enable API / Proxy
- Enable API access and/or set up Proxy for Salesforce: Default.
- Enable API / Proxy
- Enable API access and/or set up Proxy for Dropbox: Default.
- Enable API / Proxy

1 Point
Industry Differentiators

**Enterprise Visibility**
Track day-to-day progress in securing their cloud environment

**Peer Visibility**
Insights into where they stand compared to peers of the same industry and of similar size

**Recommendations**
Unique instructions to continuously improve upon security measures as the Cloud evolves
Thank you.
