Time to Tell

HUMAN
ELEMENT

February 25, 2020

8:35AM - 9:55AM

Moscone West

The sun rises and sets like clockwork, and yesterday's innovations are gone tomorrow. Except, it appears, in cybersecurity. Cyber-defenses from a generation ago linger front and center, even as the coming wave of quantum computing is poised to reshape the digital world. Steve Grobman, CTO for McAfee, will make the case that our current defenses share far too many traits with legacy immunology practices. It's time to get smart. To move beyond intelligence, because the way it's always been shouldn't always last. It's time to ask, can we act in time to change the future?

Participants:

Steven Grobman
Senior Vice President
and Chief Technology
Officer
McAfee
[Speaker](#)

Session Code:

KEY-TD3W

Session Type:

[Special Programs](#)

Delivery Format:

[Keynote](#)

Topic/Track:

[Business Perspectives](#)

[Security Strategy & Architecture](#)

Classification:

General

Pass Access:

Full Conference GOV
Full Conference Employee
