

McAfee Threat Intelligence Exchange Administration

Education Services Instructor-led Training

TM

Our McAfee® Threat Intelligence Exchange Administration course provides an in-depth introduction to policy management and the tasks that are crucial to setting up, administering, and managing McAfee Data Exchange Layer (DXL) and McAfee Threat Intelligence Exchange solutions. The combined solutions enable intelligent threat information sharing to your connected security solutions, including third-party solutions. This two-day course combines lectures and practical lab exercises, with significant time allocated for hands-on interaction with the McAfee Threat Intelligence Exchange and McAfee DXL user interfaces, as well as detailed instructions for the integration of this solution.

Agenda At A Glance

Day 1

- Welcome
- McAfee ePolicy Orchestrator® (McAfee ePO™) Software Overview
- Policy Management Overview
- McAfee Data Exchange Layer Overview

Agenda At A Glance (continued)

Day 2

- McAfee Threat Intelligence Exchange Overview
- Data Exchange Layer Management and Use
- Threat Intelligence Exchange Management and Use

Audience

This course is intended for system and network administrators, security personnel, auditors, and/or consultants concerned with system endpoint security.

Course Description

Learning Objectives

McAfee ePO Software Overview

Identify key differences between the McAfee ePO on-premises and McAfee ePO cloud interfaces and navigate through the interfaces.

Policy Management Overview

Explain the concepts and terms related to policy management.

McAfee Data Exchange Layer Overview

Explain DXL solution components, features, and functionality.

McAfee Threat Intelligence Exchange Overview

Explain Threat Intelligence Exchange solution components, features, and functionality.

Data Exchange Layer Management and Use

Perform post-deployment DXL configuration and management tasks.

Threat Intelligence Exchange Management and Use

Perform post-deployment Threat Intelligence Exchange configuration and management tasks.

Recommended Pre-Work

- Working knowledge of Windows and system administration, network technologies.
- Basic understanding of computer security, command line syntax, malware/anti-malware, virus/antivirus, and web technologies.
- Working knowledge of McAfee ePO software.
