

McAfee Policy Auditor Administration

Intel Security Education Services Administration Course

The McAfee® Policy Auditor Administration course from McAfee University provides attendees with in-depth training on the full benefits of this product. This course provides a firm foundation and hands-on experience in the installation, configuration, maintenance and troubleshooting of the McAfee Policy Auditor solution. This training also focuses on understanding the internal Policy Auditor architecture and how to build custom remedies. At the end of this course, attendees should understand the capabilities of the McAfee solution and have the capability of installing McAfee Policy Auditor.

Course Goals

- Learn how to install and administer policies.
- Create and edit benchmark checks.
- Use the new Content Creator Tool to create and edit benchmark checks.
- Import checks, create scripts, and set auditing periods.
- Configuring file integrity monitoring.
- View & customize dashboards and queries.
- McAfee Vulnerability Manager and Policy Auditor Integration.
- McAfee Risk Advisor and Policy Auditor Integration.

Agenda At A Glance

Day 1

- Introduction to Security Connected and Policy Auditor
- ePO Administrative Overview
- ePO Server Installation
- McAfee ePO Navigation and Policies
- The McAfee Agent

Audience

- System and network administrators, security personnel, auditors, and/or consultants concerned with network and system security should take this course.

- ePO Extensions
- Policy Auditor Extension
- Policy Auditor Installation Requirements
- Policy Auditor Server Installation
- Upgrading Policy Auditor
- Removing Policy Auditor

Course Description

Module 7: Policy Auditor Server Configuration

- What is Policy Auditor?
- Components
- Server Settings
- Permission Sets
- Tasks
- Performance Improvements in PA 6.0

Module 8: Policy Auditor Agent

- Overview
- Localization
- Support Operating Systems
- Installation
- Log Files
- Troubleshooting
- Displaying System Tray Icon

Module 9: Introduction to Audits

- Audit Overview
- Industry Standards
- Policy Auditor and Standards

Module 10: Benchmark Editor

- Introduction
- Viewing
- Status Types
- Configuration
- Tailoring
- Editing
- Labels

Module 11: Configuring Audits

- Include Systems in an Audit
- Choose a Benchmark
- Activate Benchmark
- Create a new Audit
- McAfee Agent Role in Audits
- Process Audit Results
- View the Audit Results

- Server Task Log
- Audit Whiteout and Blackout Periods
- Verify Audit at the System
- Tips and Tricks

Module 12: Creating Checks

- Rules and Checks Introduction
- Creating Checks
- Creating Rules

Module 13: Content Creator Tool

- Introduction
- Installation
- GUI
- Templates
- Creating a Benchmark Using the PACC Tool

Module 14: Patches and Scripts

- Importing Benchmarks
- Patches
- Service Level Agreement
- Scripts

Module 15: Waivers

- Waivers Introduction
- Configuring Waivers

Module 16: Issues and Tickets

- Issues and Tickets
- Managing Issues
- Ticketing Integration

Module 17: File Integrity Monitoring

- What is File Integrity Monitoring
- Defining FIM Policies
- Reports
- Protection
- Maintenance
- Basic Troubleshooting and FAQs
- Solving Memory Discrepancies
- Helpful Resources

Course Description

Module 18: Dashboards and Reporting

- Dashboard Overview
- New Queries & Reports
- Customizing Dashboards
- Roll-up Reporting
- Generate a Report

Module 19: Support and Troubleshooting

- Support
- Best Practices
- PA Agent Debug Tool

Module 20: Integration

- Purpose of Integration
- Example of Need
- Compliance Solutions

Module 21: Introduction to Vulnerability Manager

- Overview
- Components
- Architecture
- Communication
- Installation
- Module 22: Vulnerability Manager and Policy Auditor Integration
- Integration Architecture
- Configuration
- Performing an Audit Using Vulnerability Manager

Module 23: Introduction to Risk Advisor

- Overview
- Product Integration
- Architecture
- Installation

Module 24: Risk Advisor and Policy Auditor Integration

- Configuration
- Permissions
- Integration
