

McAfee Network Security Platform 8.2 Essentials Course

Education Services eLearning Course

The McAfee® Network Security Platform Administration course from Education Services is an essential component of implementing a successful intrusion prevention strategy. Learn how to deploy and configure a Network Security Platform (NSP) solution to protect against real-world attacks. You can immediately apply your new skills to improve protection for your business and take full advantage of your investment in our Network Security Platform.

Course Goals

- Provide a description of NSP features, purpose, and benefits.
- List pre-installation requirements.
- Follow instructions to complete installation.
- Navigate menu structure to locate where to configure each feature.

Agenda At A Glance—5 hours

- Module 1: Introduction
- Module 2: Installation
- Module 3: Event Management
- Module 4: Policy Management
- Module 5: Maintenance and Troubleshooting

Audience

System and network administrators, security personnel, auditors, and/or consultants concerned with network and system security should take this course.

Course Description

Recommended Pre-Work

It is recommended that students have a working knowledge of Microsoft Windows administration, system administration concepts, a basic understanding of computer security concepts, and a general understanding of Internet services.
