

Building a Sustainable Security Operations Model

Compartmentalized operations can't compete with advanced threats.

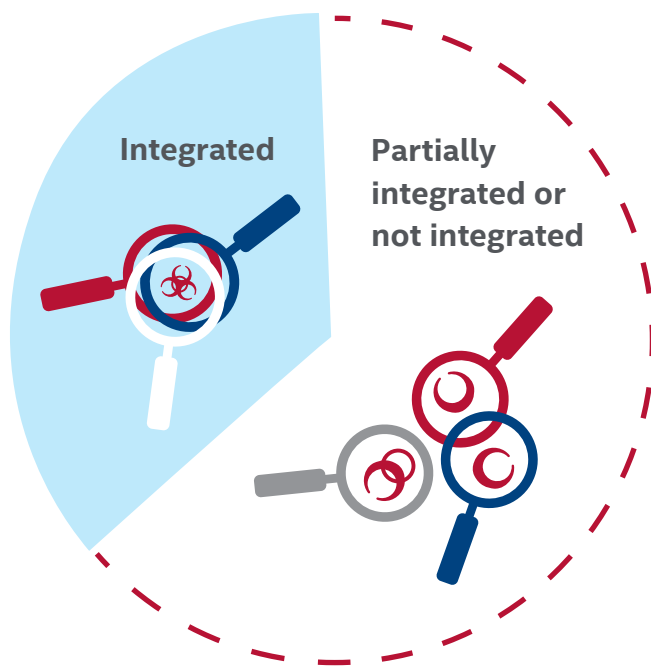

Threats are becoming more complex.

6/10

Incidents in 2015 involved complex techniques and deliberate malice.¹

Separating the signal from the noise is hard with many tools, little integration.

68%

of respondents reported that their intelligence and analytics were either unintegrated or only partially integrated with their incident response systems.²

Breaches happen in minutes. Remediation can take days.

82%

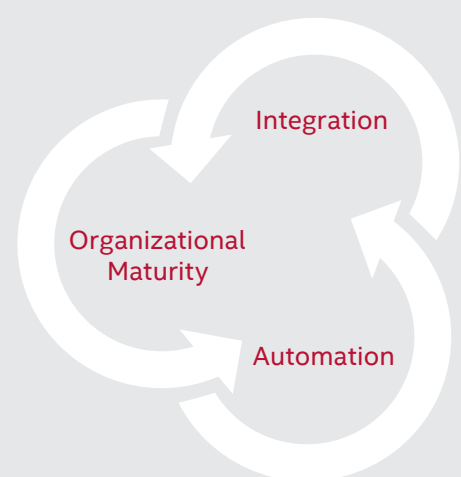

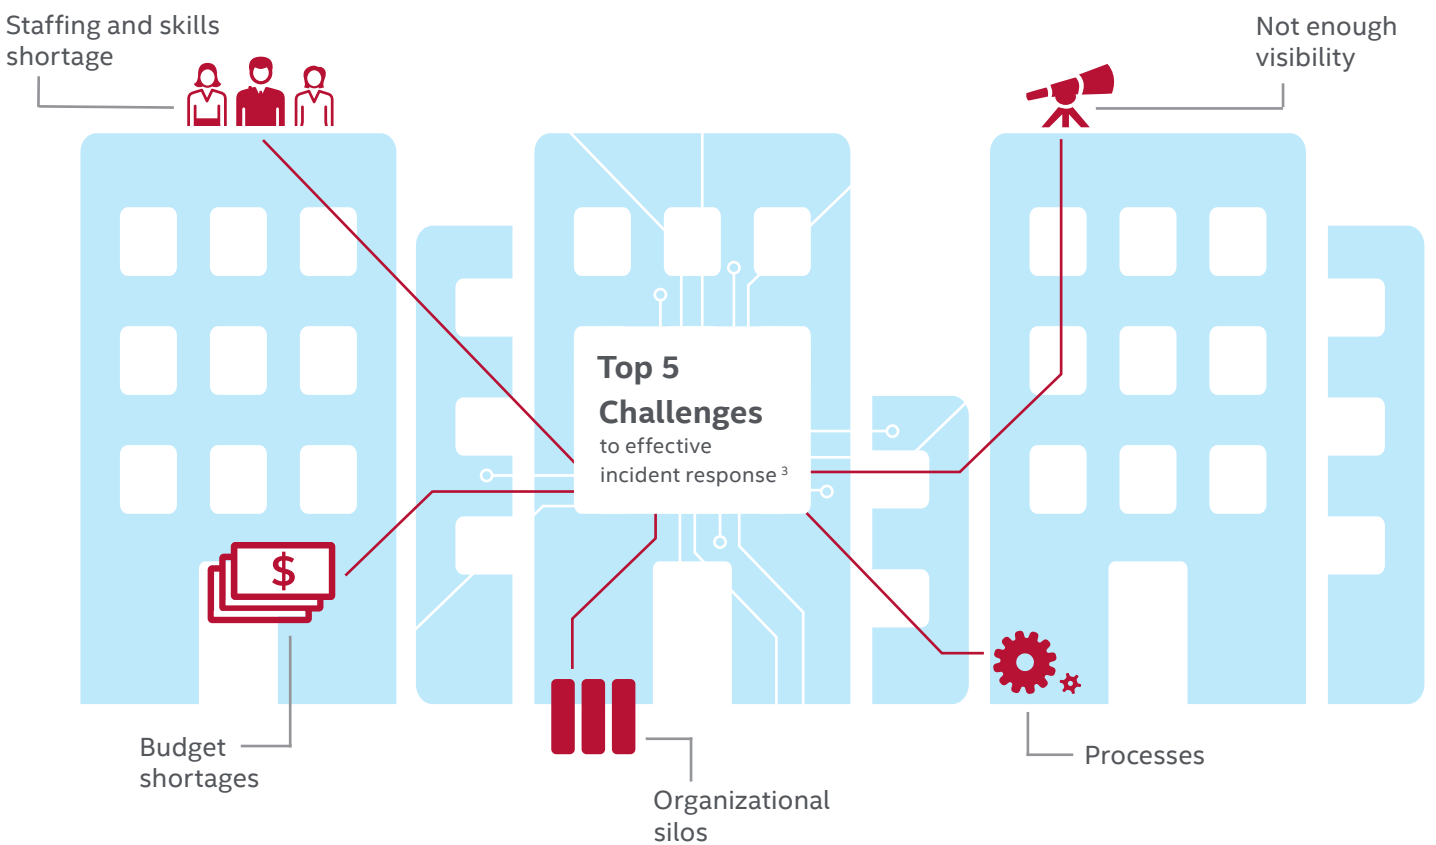

of compromises occur within minutes

3 days

is the average amount of time it takes to remediate

Sustainable security operations help overcome top inhibitors.

Integrate, automate, & adapt.

Get the facts on advanced threat and incident management and learn how Intel Security can help your team integrate proactive threat management into your day-to-day security.
