

McAfee vPatch Security Update

McAfee vPatch Security Update 58

This vPatch Security Update includes:

- New rules 6374, 6376 and 6378 were added for Oracle to detect exploitation of CVE-2011-0799, CVE-2011-0799 and CVE-2009-0984 respectively
- New rules 3060 and 3062 were added for MySQL to detect exploitation of CVE-2013-5891 and CVE-2014-0402 respectively
- New rules 5641 and 5647 were added for MySQL to detect suspicious behavior on the database
- New rules 5643 and 5645 were added for MSSQL to detect suspicious behavior on the database
- Improved detection logic in the following vPatch rules: 5582, 6236 and 6240
- Multiple ongoing metadata updates for numerous vPatch rules

Current update is cumulative and includes the content of all previously released vPatch updates.

Previous release notes can be found here.
