

McAfee vPatch Security Update

McAfee vPatch Security Update 85

This McAfee vPatch Security Update follows a major vendor update:

- New rule 3908 to monitor and protect MySQL database.
- New rule 3910 to monitor and protect MySQL database against exploitation of CVE-2017-3456 vulnerability.
- Improved multiple rules to monitor and protect MySQL database.

The current update is cumulative and includes the content of all previously released vPatch updates.

Previous release notes can be found [here](#).
