

McAfee vPatch Security Update

McAfee vPatch Security Update 88

This McAfee vPatch Security Update follows a major vendor update:

- New rule 3914 to monitor and protect MariaDB database.
- New rule 3916 to monitor and protect MariaDB database.
- Improved rule 5510 to monitor and protect MSSQL database.

The current update is cumulative and includes the content of all previously released vPatch updates.

Previous release notes can be found [here](#).
