

McAfee vPatch Security Update

McAfee vPatch Security Update 78

This McAfee vPatch Security Update follows a major vendor update:

- Improved rule 6448 to monitor and protect Oracle database.
- Added new rule 6450 for Oracle database.
- Added new rule 7856 for MSSQL database.
- Added new rule 3896 for MySQL database to address a vulnerability of zero day CVE-2016-6662.

The current update is cumulative and includes the content of all previously released vPatch updates.

Previous release notes can be found [here](#).
