

## McAfee vPatch Security Update

### McAfee vPatch Security Update 54

This vPatch Security Update is released following major vendor updates

- Added rule 3826, 3827 and 3828 for MySQL to detect exploitation of vulnerabilities fixed in CPU July 2013 (bug # 16347343, bug # 16075310 and CVE-2013-3802 respectively)
- Added rules 8618 and 8620 for DB2 to detect exploitation of a 0-Day vulnerability and a suspicious activity respectively
- Added rule 6362 for Oracle to detect exploitation of CVE-2010-2411
- Improved detection in rule 6224 for Oracle to detect additional exploitation vectors
- Merged rule 3823 and 3052 due to different CVEs that refer to the same issue
- Updated metadata of rules 8604 and 8612 for DB2 platform
- Updated metadata of rules 1334, 3052, 3809 and 3822 for MySQL
- Updated metadata of rules 1503 and 6358 for Oracle

Current update is cumulative and includes the content of all previously released vPatch updates.

Previous release notes can be found here.
