

McAfee vPatch Security Update

McAfee vPatch Security Update 70

This vPatch Security Update follows major vendor update:

- Added rule 6442 for Oracle database to address a Zero Day vulnerability discovered by McAfee Research team.
- Added rule 6444 for Oracle database to address a vulnerability.
- Added rule 6446 for Oracle database to address a known vulnerability (CVE-2015-4900).
- Improved detection logic of rules 1828, 1836, 1837 to detect SQL injections.
- Improved detection logic of rule 7848 for MSSQL database to detect privilege escalation.

Current update is cumulative and includes the content of all previously released vPatch updates.

Previous release notes can be found [here](#).
