

MCAFFEE FOUNDSTONE FSL UPDATE

To better protect your environment McAfee has created this FSL check update for the Foundstone Product Suite. The following is a detailed summary of the new and updated checks included with this release.

NEW CHECKS

21191 - Microsoft Windows SMBv2/SMBv3 Client Denial Of Service Vulnerability

Category: Windows Host Assessment -> Patches and Hotfixes
(CATEGORY REQUIRES CREDENTIALS)

Risk Level: High

CVE: CVE-MAP-NOMATCH

Description

A denial of service vulnerability is present in some versions of Microsoft Windows.

Observation

The Windows kernel is the core of the Windows operating system.

A denial of service vulnerability is present in some versions of Microsoft Windows. The flaw lies in the SMBv2/SMBv3 Client. Successful exploitation could allow a denial of service condition.

HOW TO UPDATE

FS1000 APPLIANCE customers should follow the instructions for Enterprise/Professional customers, below. In addition, we strongly urge all appliance customers to authorize and install any Windows Update critical patches. The appliance will auto-download any critical updates but will wait for your explicit authorization before installing.

FOUNDSTONE ENTERPRISE and PROFESSIONAL customers may obtain these new scripts using the FSUpdate Utility by selecting "FoundScan Update" on the help menu. Make sure that you have a valid FSUpdate username and password. The new vulnerability scripts will be automatically included in your scans if you have selected that option by right-clicking the selected vulnerability category and checking the "Run New Checks" checkbox.

MANAGED SERVICE CUSTOMERS already have the newest update applied to their environment. The new vulnerability scripts will be automatically included when your scans are next scheduled, provided the Run New Scripts option has been turned on.
