142884 - SuSE SLES 10 SP4, 11 SP2, SLED 10 SP4 SUSE-SU-2013:0701-2 Update Is Not Installed

Category: SSH Module -> NonIntrusive -> SuSE Patches and Hotfixes

Risk Level: High

CVE: CVE-MAP-NOMATCH

Description

The scan detected that the host is missing the following update:

SUSE-SU-2013:0701-2

Observation

Updates often remediate critical security problems that should be quickly addressed.

HOW TO UPDATE

FS1000 APPLIANCE customers should follow the instructions for Enterprise/Professional customers, below. In addition, we strongly urge all appliance customers to authorize and install any Windows Update critical patches. The appliance will auto-download any critical updates but will wait for your explicit authorization before installing.

FOUNDSTONE ENTERPRISE and PROFESSIONAL customers may obtain these new scripts using the FSUpdate Utility by selecting "FoundScan Update" on the help menu. Make sure that you have a valid FSUpdate username and password. The new vulnerability scripts will be automatically included in your scans if you have selected that option by right-clicking the selected vulnerability category and checking the "Run New Checks" checkbox.

MANAGED SERVICE CUSTOMERS already have the newest update applied to their environment. The new vulnerability scripts will be automatically included when your scans are next scheduled, provided the Run New Scripts option has been turned on.
