

## McAfee Host Intrusion Prevention Content 5664

### Release Notes | 2014-06-01

Below is the updated signature information for the McAfee Host Intrusion Prevention 7.0/8.0 content (version 5664)

---

#### Deleted Windows Signatures

**[Deleted] Signature 6666:** *Generic Java Sandbox Escape Exploit Detected*

*Description:*

- *This signature has been deleted as this found to be causing performance issues on some systems with Java applications.*

#### How to Update

You need to check in the update package to the ePO Repository, and then send the updated information to the agents. Please refer to 'Updating' in Chapter 8 of 'Host Intrusion Prevention Product Guide'
