

## McAfee Host Intrusion Prevention Content 5710

### Release Notes | 2014-06-12

Below is the updated signature information for the McAfee Host Intrusion Prevention 7.0/8.0 content (version 5710)

---

#### Updated Windows Signatures

***[Bugfix] IE Freeze with Java application***

*The content package has been reverted to the previously working content, 5626 released in May'14.*

#### **How to Update**

You need to check in the update package to the ePO Repository, and then send the updated information to the agents. Please refer to 'Updating' in Chapter 8 of 'Host Intrusion Prevention Product Guide'
