

## McAfee Vulnerability Manager for Databases Update

### McAfee DVM Security Update v96

#### McAfee DVM Security Update v96

This update includes:

- New content for SAP HANA (supported on ePO v5.1.2 and above) to detect missing patches and vulnerable installations \*
- New configuration check for MSSQL - MSCONF\_SA\_NOT\_DISABLED
- Renamed CISORA111001.1.1-27 family to ORADEFPW1409-35 respectively. Tags remained identical
- Fixed issue with ORAPATCH044 which incorrectly reported 11.1.0.7 as being 'not supported'
- Updated checks for PostgreSQL to detect latest missing patches
- Improved ORAINTEG09 to use *FULL OUTER JOIN* to retrieve results for users without profiles
- Improved logic for MSOS\_3\_3 to account for system and database installation paths when checking against the data path
- Ongoing updates and metadata updates for various checks

Previous release notes can be found [here](#).

(\*) Note: Please see [KB83347](#) for details on how to create scan user for SAP HANA.
